We can help you

Avoid a Stroke

Getting Screened is Simple!
Painless, non-invasive, keep your clothes on.

There's a simple, convenient way for you to get preventive health screenings, enabling you to take charge of your health.

Using ultrasound technology, Life Line Screening can now actually see inside your arteries for plaque buildup, one of the leading causes of stroke.

Unfortunately: For 4 out of 5 people who have a stroke, their first symptom is a stroke.

The Good News: 80% of strokes and heart disease can be prevented.

We will be in your neighborhood soon.

Where: Huron - Huron Event Center
When: Saturday, June 18, 2022
Pre-registration is required. Call: (888) 763-4154
Priority Code: FFXJ275

Those with abnormal results should discuss possible next steps with their family healthcare provider and ensure they understand the risk and benefits of any additional testing or procedures.
We Can Help You Avoid a Stroke

Trusted by Hospitals Nationwide

Life Line Screening has partnered with over 100 hospitals across the country and has screened over 10 million participants. Why? Because so many people have told us that our ultrasound screenings have helped save their lives.

1 **Carotid Artery Disease:**
an ultrasound is performed to screen the carotid arteries (a pair of blood vessels in the neck that deliver blood to your brain) for buildup of fatty plaque. This buildup, called atherosclerosis, is one of the leading causes of stroke.

2 **Atrial Fibrillation (AFib):**
a 6-lead electrocardiogram (EKG) is performed by placing sensors on the arms and legs to screen for Atrial Fibrillation. AFib can lead to blood clots, stroke, and heart failure, and other heart-related complications.¹

3 **Abdominal Aortic Aneurysm (AAA):**
an ultrasound is performed to screen the abdominal aorta for the presence of an enlargement or aneurysm. AAA can lead to a ruptured aortic artery, which is a serious medical emergency.

4 **Peripheral Arterial Disease (PAD):**
an Ankle-Brachial Index (ABI) test is performed using blood pressure cuffs on the arms and legs. It is important to screen for PAD because it increases the risk of coronary artery disease, heart attack, or stroke.²

5 **Osteoporosis Risk:**
an ultrasound is performed to measure the shin bone for abnormal bone mass density. This can help assess the risk of osteoporosis, a disease where bones become weak and brittle.

Get **ALL 5 Screenings for the special package price of $159**, a savings of **$171!** if purchased separately

No single screening can detect all risk factors for all conditions, such as and including the presence of coronary artery disease.

Screening results are provided to you within 14 days. We direct all participants with abnormal results to take the report to their physician. Appropriate modification of stroke risk factors (including high blood pressure, smoking, heart disease, diabetes and poor diet) is also necessary for stroke prevention. Our screenings cannot detect all forms of stroke. All tests are for screening purposes only. You should consult with your personal physician regarding your screening results. Insurance Note: Life Line Screening does not participate in the Medicare program and the cost of our screening services is not covered or reimbursable by Medicare. Life Line Screening does not file insurance claims nor provide referrals to any physician’s group or hospital. Price does not include any applicable review fees. Screenings in California are provided by Life Line Mobile Screening, a physician owned practice. Screenings in Kansas are performed by Life Line Screening of America, Ltd. on behalf of Life Line Screening Physicians, P.A. Screenings in New Hampshire, New Jersey and New York are performed by Life Line Medical Screening, LLC (Dr. Andrew Manganaro, 70 Niagara Street, Buffalo NY, 14202). Life Line Screening does not engage in the practice of medicine in those states. This information is not intended to induce referrals by Life Line Screening to Life Line Medical Screening, LLC for any professional medical service. Texas residents: Physician authorization is required. A Life Line Screening affiliated physician will provide authorization for you if you qualify. Cancellation Policy: If you are unable to attend the screening for any reason whatsoever, we will issue a gift card for the full amount to be used by you, or anyone you choose, for future screening services.
