

Farmers and Merchants Bank Hosts Screening To Detect Your Risk For Stroke In Less Than Ten Minutes!

"It was very fortunate my doctor suggested I have your screening. Your tests showed a large **Aortic Aneurysm**. Then with further tests, they found an artery in my heart blocked. I have now had a stent put in my heart and my Abdominal Aorta. **If I had not had your screening, I might not be here.**"
Gary W. Hedlund – Huron, SD

"I felt fine and had no symptoms. I had **90% blockage in my right Carotid Artery**. I was looking at a **potential stroke**. I have now had surgery and I am doing fine. This is very cheap insurance for your own protection." **Jackie Welberg – Ortonville, MN**

Farmers and Merchants Bank

333 Dakota Ave. S. - Huron

Thursday April 6 9:00 - 4:30

Appointments Are Necessary. Please Call 515-244-3080

Four Life Saving Screenings

Stroke Screening	Abdominal Aortic Aneurysm	Peripheral Arterial Disease	Osteoporosis
This screening visualizes the buildup of fatty blockage in the carotid arteries. This condition causes the majority of strokes.	This screening visualizes the existence of an aneurysm in the abdominal aorta that can rupture and be fatal.	This screening checks for blockage in the legs. Abnormal results indicate high risk of coronary artery disease and peripheral arterial disease.	This test screens for abnormal bone density. Both men and women can prevent Osteoporosis with early detection and treatment.

These Three Screenings \$125

The following tests are also offered individually:

CHEMISTRY PANEL - \$60

Also known as the Comprehensive Metabolic Panel, this provides a high-level evaluation of the body's major organ functions including the heart, liver, kidney, gland, nerve, bone, and muscle functions. Conducted together, these test determine risk of coronary heart disease.

PROSTATE CANCER (PSA) TEST - \$60

Prostate cancer is a common cancer in men. This test measures prostate-specific antigen (PSA) in the blood. Elevated levels of PSA could indicate the presence of cancer, an infection, or an enlarged prostate.

A1c SCREENING - \$60

The A1c screening measures the average blood sugar level for the past two to three months. The American Diabetes Association recommends that the A1c test be the primary screening tool used to diagnose prediabetes, type 1 diabetes, and type 2 diabetes.

VITAMIN D DEFICIENCY TEST - \$60

Vitamin D maintains bones, fights infection, keeps muscles functioning properly, and more.

LIPID PANEL - \$60

These tests are good indicators of one's risk of a heart attack or stroke caused by blockage of the blood vessels or hardening of the arteries. Tests included are Total Cholesterol, HDL (Good Cholesterol), LDL (Bad Cholesterol), and Triglycerides.

THYROID (TSH) TEST - \$60

Thyroid disease occurs when the thyroid gland, part of the endocrine system, malfunctions either because it produces too much (hyperthyroidism) or too little (hypothyroidism) thyroid hormone.

HIGH SENSITIVITY-C REACTIVE PROTEIN (hs-CRP) SCREENING - \$60

The level of C-Reactive protein in the blood is a marker for inflammation in the body and a strong indicator of risk for cardiovascular disease.

TOTAL TESTOSTERONE LEVEL - \$60

Low testosterone is associated with loss of muscle mass and body hair, low sex drive, increased breast size, irritability, and brittle bones.
